Issues addressed in this release

Key	Summary	Updated	Type	Sdn Reference
VPCIPA-1741	Update DV Restore Repo Filter to handle client to server Restore process	Mar 14, 2017		
1 issue				

Release Content Information.

ont-dv

Change log detail

- This will tell the client that the account needs to be restored from the client side.
- To support the client restoration process a servlet filter will be added to DV. The filter will allow: Unblock users that are currently corrupted and not able to upload

Signal the client when an account is ready to be restored

Testing

See accompanying documentation
